

TC Economy Eggcrate Louvre

The TC Economy Eggcrate Louvre is designed to give maximum lighting output through 15x15x8mm cell configuration. This Louvre is injection moulded on the most modern computer controlled system and each individual Louvre is coated with an anti-static fluid to prevent the airborne dirt and dust from sticking to the cell walls during installation.

The standard TC polystyrene louvres are manufactured with a solid white finish. Other colours are available subject to quantities. TC Economy Louvres are sustainable for many applications. Each Louvre is moulded with overlapping ends (as in the photo). This enables the Louvre to be installed in continuous run lighting systems with the cells lining up. TC Louvres are moulded in a range of panel sizes. Panels can also be cut to customers individual requirements.

Product Data	TC – Economy Eggcrate
Cell Size	15 x 15 x 8 mm
Moulded Panel Size	1195x595 1210x600mm Special Order 620x1245mm
Material	Polystyrene / Acrylic
Packed Per Carton	1195x595mm : 15pcs 595x595mm : 30pcs
Weight per Carton	11kg
Carton Size	1250x650x125mm
Colours Available	White / Black
Stocked Sizes	1210x600mm 1195x595mm 595x595mm
Non Standard Sizes	Cut to order / balance cutting to special order
